Simile Worksheet

Name: _____

Date: _____

A heron wades through the water and searches for food. It raises its wings high over its head. The feathers on its wings block out the sun, so the bird can see fish and frogs in the water.

A heron's feathers shade out sun like

_____.

A swan glides smoothly across a pond. Air trapped between its feathers helps it float on top of the water.

A swan's feathers float like

_____.

A female cardinal has tan and gray feathers. The feathers blend in with her forest home. They keep her safe while she sits on her nest.

A female cardinal's feathers hide her from enemies like _____.
